Summary

Full-stack software engineer who has shipped production systems end-to-end, from SaaS features for Global 500 clients to sole-architecting a HIPAA-compliant healthcare platform on AWS. Specializes in React, Next.js, and TypeScript, with hands-on cloud infrastructure experience.

Skills

Languages: JavaScript, TypeScript, SQL

Frontend: React, Next.js, Tailwind CSS, HTML/CSS, MUI

Backend & APIs: Node.js, REST, GraphQL, Prisma

Cloud & DevOps: AWS, Docker, Git, GitHub

Experience

Full-Stack Software Engineer, Freelance ([ApplyMate](#))

Mar 2026 - Jun 2026

- Designed and built a full-stack job-application tracking platform using Next.js, TypeScript, Prisma, and PostgreSQL, replacing manual spreadsheet tracking.
- Built a Chrome extension using JavaScript that pulls job postings from LinkedIn and 10+ job boards into the tracker, eliminating manual copy-pasting.
- Built REST API routes integrating the OpenAI API to score job postings against user criteria and auto-generate tailored cover letters, cutting time spent evaluating and applying to roles.
- Adopted by 10-20 early users tracking 1,000+ applications combined.

Full-Stack Software Engineer, Freelance ([SmartChart Pro](#))

Aug 2025 - Mar 2026

- Built an EMR platform for an assisted living facility using Next.js, React, and PostgreSQL, replacing paper-based clinical documentation.
- Containerized and deployed the platform on AWS using Docker, ECS Fargate, RDS, VPC, and ALB, architecting the full infrastructure end to end.
- Built core security controls using bcrypt password hashing, audit logging, and role-based access to support HIPAA-aligned handling of resident health records.
- Built REST endpoints for shift scheduling, resident and staff management, and PDF report generation, giving facility managers a single system to oversee daily operations.

Frontend Software Engineer, Freelance ([eLink Online Service](#))

Jun 2024 - Aug 2025

- Built the UI for order status and delivery tracking on a B2B distribution platform, connecting to GraphQL endpoints using React, TypeScript, and MUI.

Frontend Software Engineer, Strivion ([Curivio](#))

Feb 2024 - Apr 2025

- Shipped frontend features for a SaaS platform used by Global 500 clients including Telekom, Deutsche Bahn, and Deutsche Bank, in an Agile team, using Next.js, TypeScript, and GraphQL.
- Built a fully editable company profile page using React Hook Form and Zod, letting admins manage their own bio, FAQs, and content without engineering support.
- Migrated modal state management across 10+ modals from Zustand to URL-based state using nuqs, improving navigation reliability and enabling shareable deep links.
- Acted as technical lead with design agencies and stakeholders to build a CMS-driven landing page system using Strapi, letting marketing launch new pages without code or deployment.

Education & Certificates

Bachelor's Degree in Software Development, IU of Applied Sciences
AWS Certified Cloud Practitioner

Graduated in 2025
Valid until Nov 2028
